TAKE THE CONTROL OF YOUR CASES AN EFFICIENT APPROACH

Through a combination of lectures, hands-on, and live patient sessions. This Course Will teach participants When and how to use TADs To achieve optimal Results

Whatever is your treatment method, this course will teach you the new thinking process in modern orthodontics, and how to integrate TADs in your treatment planning.

The course will be led in Tunis by Dr Ellouze who is a world leader in the fields of PSL, Tads, Lingual orthodontics and Aligner's, and functional therapy.

WHY TAKE THIS COURSE ?

To Dr ELLOUZE, the only person who matters
is the next patient to treat

During this course, Dr Skander ELLOUZE will share the most effective treatment options, and show highly relevant clinical tips based on a very rich experience with all treatment methods. The course will allow beginners as well as experienced doctors to master TADs placement in different sites, and the biomechanics behind the use of TADs.

Dr. **SKANDER ELLOUZE**

Dr Ellouze is recognized internationally as a world leader in the field of Lingual orthodontics, passive self-ligation, skeletal anchorage systems (TADs), and “an optimized use” of clear Aligners. He lectures internationally in the main scientific events and at several universities to share his passion for high quality orthodontics.

Dr. Ellouze is an active member of European College for Orthodontics, the ESLO and WSLO ...

He regularly publishes scientific articles, and recently published a book titled: Mini-Implants: Orthodontics for the future (Quintessence International - French & English versions)
